Re: Picillo Waste Disposal Site - Request For Information

Dear Ms. Tribble:

This is in response to your request for information of August 25, 1982, for documents and other information relevant to the involvement of American Cyanamid, Agricultural Research Division, with the Picillo waste disposal site in Coventry, Rhode Island. I apologize for the delay in responding.

EPA's investigation concerning the disposal of hazardous wastes and hazardous substances at the Picillo site has not yet been concluded. If EPA's investigation indicates that it would be appropriate to initiate discussions with you concerning cleanup activities at the site, you will receive a notification letter to that effect. If a decision is made that you are not a potentially responsible party, then you will not receive such a letter.

Should you receive a notification letter, and should a meeting be set for discussion of this matter, it is possible that EPA will assemble a briefing package to be distributed to you at such a meeting. This package may include information concerning the site and your involvement. Until such time, however, the Agency will not be able to release information of the nature you requested.

If you have any questions, please feel free to contact me at 617/223-5779.

Sincerely yours,

Joel Blumstein, Attorney  
Office of Regional Counsel
